

FIMECS Presents at the Frontiers of Drug Discovery 2024

Kanagawa, Japan, 10th Jun 2024 – FIMECS, Inc. (“FIMECS”), a private biotechnology company creating a new class of drugs based on targeted protein degradation, today announced that Yusuke Tominari, Ph.D., CEO of FIMECS will present at the Frontiers of Drug Discovery 2024 organized by LINK-J (24th Jun 2024, Muromachi Mitsui Hall & Conference, Tokyo). He will introduce Targeted Protein Degradation and FIMECS proprietary platform RaPPIDS™ and participate in the panel discussion with 1st tier scientists of new modalities.

Everybody can attend the symposium.

About FIMECS, Inc.

FIMECS, Inc. is developing a new class of drugs based on targeted protein degradation for the currently ‘undruggable’ targets in immuno-oncology and oncology areas. The company became able to discover drug candidates for inducing the degradation of disease-relevant targeted proteins by integrating proprietary E3 ligase binders and RaPPIDS™ platform. This drug discovery platform will help providing drugs to the patients all over the world through various internal and collaboration projects. <https://www.fimecs.com/eng/>

About RaPPIDS™

RaPPIDS™ (Rapid Protein Proteolysis Inducer Discovery System) is one of the proprietary drug discovery platforms of FIMECS, Inc. used to generate therapeutic candidates of the targeted protein degrader. The platform allows synthesizing and evaluating various degraders quickly based on the company’s proprietary know-how and diversity-oriented synthesis, and delivery of the drug candidates with the best combination of target protein binders, linkers, and E3 ligase binders. Moreover, RaPPIDS™ platform enables the discovery of novel E3 ligase binders, which is expected to dramatically expand the range of target proteins that can be degraded.
